

# Are you getting tired of replacing and replacing corroded pumped condensate piping?

**Rovanco<sup>®</sup>** can help you eliminate this problem.

**In the past your condensate pipe options were:**

- Most have used a thicker schedule 80 or schedule 160 steel pipe to last longer -- but they still failed.
- Some have used stainless steel -- that is a very expensive solution.
- Others have used fiberglass pipe -- but it hasn't proven to be the answer in all cases either.

Let **Rovanco<sup>®</sup>** show you how **RHINOFLEX<sup>®</sup>** Pre-insulated Pex Pipe can eliminate your problems with corroded condensate pipes for pumped and vented systems.

**Your benefits are:**

- \* All non-corrosive materials
- \* Thermally efficient foam insulation
- \* Tough HDPE outer jacket
- \* Faster installation time
- \* Labor cost savings
- \* Rated for 204°F at 90 PSI service

3/4" to 4" size in coils 1200' long
